

draft source	draft shape					verification					memory				execution				
	single chain	static tree	dynamic / optimised tree	multiple drafts	adaptive length	greedy match only	token-wise rejection	multi-draft coupling	block / sequence-level	cross-vocabulary	sparse / streaming KV	quantised weights / KV	constant-memory drafter	offloaded target	hierarchy of drafters	overlap draft & verify	drafter on other devices	load-aware speculation	latency-SLO-aware
separate small LM	10	4	2	3	3		14	4	2	1	2			2	3	4	3	1	
target's own layers / weights	5				1		9				3	2			1			1	
parallel heads on target	2	1				1	2												
AR head on target features		3	6				9		1				1						
lookup: prompt / references	3	1	1		2	1	5											1	
lookup: datastore / history	1	2	1		1		4												
Jacobi n-gram pool				1			1												
parallel / diffusion drafter	4				1		6												

Number of papers whose drafter is of this kind and that also have the column's trait (● or ○ in the matrix). Dashed empty cell: no paper tried it yet (not every one makes sense).
